

Design with Purpose

Get Making Today!

Every Single Day.

We make your prototype with a specific goal in mind, whether that's testing the functionality of your idea, or making you a "looks-like" prototype for a pitch meeting - we can do it all! We use many different types of machines to make prototypes.

How we work.

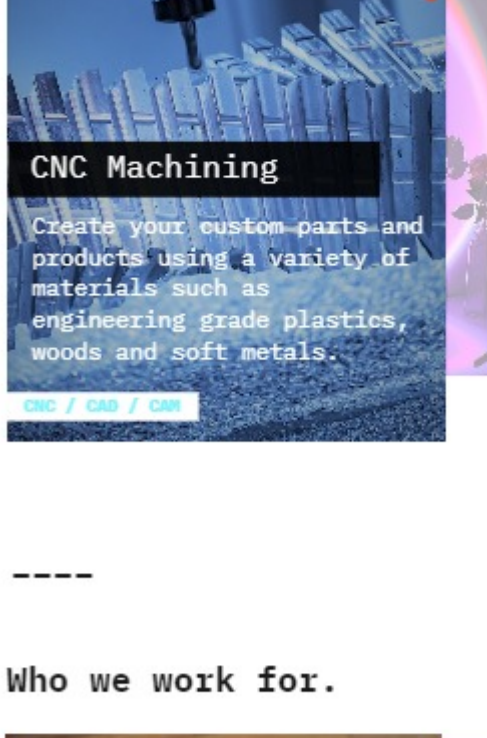

Rapid Prototyping

Take your ideas to the next level FAST! From product renderings to a functioning product, we can get your idea off the ground and ready for market.

CAD / CAM / SLA / FDM / CNC

What we work with.

CNC Machining

Create your custom parts and products using a variety of materials such as engineering grade plastics, woods and soft metals.

CNC / CAD / CAM

Who we work for.

DJI Ronin-S

"We look forward to our next project together"

-Matt Levey
product development

CAD / SLA / CAM / CNC

Lets get started!

Time to get serious & bring your ideas to life.
